

# Saturday Special, Sept. 26th

## Economy in Buying Children's Hosiery.

That's what it is if you buy them here, and especially next Saturday. We have got a pretty good reputation of passing out extra values in Children's Hosiery and we propose to maintain it—even better it, if possible—and the kind we sell Saturday will help it, for they are the kind most merchants sell for 25c per pair.

**Saturday We Will Sell Them for 16c  
Per Pair or Three Pairs for 45c.**

Bring in your barefooted boys with cheeks of tan, or send them in, for it's time to cover up those bare feet now—or at least time to prepare—and you can do the most of it in the best way for the least money right here.

### CATTLE FEEDS.

Experiment Station Sends Out Another Bulletin.

The Vermont Experiment station has just issued Bulletin 100 and 101.

No. 100 discusses paying for separator cream at creameries. It points out why more should be paid proportionately to those patrons who sell cream than to those who deliver milk. Some creameries do make this distinction, but more do not, and all should do so. It also indicates some of the common errors of cream sampling and analysis and suggests means whereby they may be avoided. Every patron of a creamery, particularly those who own hand separators, should send for and read this bulletin. It may be had without charge for the asking.

No. 101 discusses the feed trade of the state. It warns buyers of cottonseed meal to be particularly watchful lest adulterated goods be foisted upon them, since there are indications that these will be offered this fall in larger volume than hitherto. It describes a simple means whereby anyone may detect such adulterations.

Either or both these bulletins will be mailed without charge to any address on request. Inquirers desiring to receive future issues should ask that their names be placed on the mailing list. A postal card addressed to the Experiment Station, Burlington, Vermont, stating desires, is sufficient.

### Who Will Claim Them?

### POULTRY NOTES.

While the hens are molting clean out all the old nests and make new ones. Do not let geese and ducks roost with the chickens. Both will be the worse for it.

Don't let pigeons roost near your chicken house. Nearly all pigeons are covered with mites.

Watch the cats and rats lest they carry off a great many of the chicks before you are aware of it.

Kerosene and lime are the two most necessary things for the poultry house during the summer months.

Feed the hens on sunflower seed and oil meal and they will molt early and begin to lay during October.

Do not leave eggs in the nests for nest eggs. China eggs are inexpensive and never tempt the hens to eat them.

### SOUTH RYEGATE.

David Fisk has just bought a new corn harvester which he is using on his farm to advantage.

Harry Esley's horse took fright at something last Tuesday forenoon, while Harry was in Terry's store, ran down the river road and left the wagon over the bank in Andrew Buchanan's field. A broken shaft and harness was all the damage done.

At the telephone meeting last Saturday evening a committee of three was elected with power to select a route and build a line to connect So. Ryegate with Newbury Center. Said committee are Dr. G. W. Darling, Geo. H. Robin and Alex. Benton.
